Values

Life is accelerating towards a future that is becoming ever more difficult to forecast. Everything seems to be in a state of flux. «You only continue by changing. You must change so as to be able to continue.» These pensive words by Friedrich Georg Jünger integrate permanence into change.

International Finance Bank Group, the specialist for asset structuring has a dual obligation: to incorporate values which survive the permanence of change, above and beyond geographical borders and generations; to master the tempo and thrust of change on the business and finance markets and in science and technology, so as to utilize them with foresight and deliberation for the needs of our clients. The experienced specialists in IFB Group methodically expand their capabilities, using the most modern of instruments to develop innovative financial products and services. Yet whatever the modern means of communications, the personal relationship between client and advisor remains the keystone. Lived integrity, reliability and fairness guarantees responsibility.

IFB Group places great emphasis on values which preserve and on change which develops. Thus the columns on which our self-image and success rest are trust, expertise and tradition. Tradition also means experience. Experience also means an incentive, a challenge. Internationally-practiced finance experts, investor friendly concepts, and modern financial instruments signify quality. A decidedly ethical impetus, strict confidentiality, and the highest international standards in accepting deposits form the basis of a good reputation.

IFB Group offers its discriminating clients a wide range of advantages:

- Long years of experience in international trust transactions.
- Top quality advice.
- The rewards of an attractive financial concept.
- The concentrated expertise of IFB Group. Dedicated to your security – and that of your assets.

Dr. Michael Herzog
President IFB Group

Trust is our capital Self-image with a difference

IFB Group – two words which constitute a seal of quality. For guaranteeing the trust of our clients, worldwide. For personal closeness. For professionalism and partnership on the road to new horizons. For international networks and deep roots.

The clients of IFB Group are extraordinary personalities, professionally successful, and dedicated to family assets. Those assets must be protected from unlawful access, from the vagaries of the financial markets, from political crises. This requires a partner who recognizes trends at an early stage and acts with initiative and foresight.

To develop assets and to safeguard and structure them vigilantly – that is our strength. Responsibility and caution are our commands when it comes to tailor-made investment planning, providing solutions for our clients, their families, their companies, or for the assets entrusted to us.

IFB Group stands for a comprehensive approach to the international investment business. Small enough to be personal, we have simple and clear structures and the flexibility required for an individual collaboration. A valuable combination, adopted with a view to gaining and consolidating the trust of discriminating clients. That trust is our capital.

Knowledge is like art Both offer new perspectives.

What is really important is concealed within, that little extra. It is with this in mind that the 80 employees of IFB Group operate. Our awareness of that something «extra» is tangible in our corporate culture. We advise people, not assets.

Whereas IFB Group's headquarters are located in Berlin, we also have representations in Austria, Australia, Argentina, Canada, China / Hong Kong, France, Germany, Great Britain, Greece, Guinea, Israel, Italy, Jordan, Japan, Mexico, Portugal, Spain, Switzerland, South Africa, Taiwan, Thailand, United States of America, Uruguay and Venezuela.

The IFB advisor invites you to enter into a dialogue and provides clarity on asset planning and strategy.

He joins you discretely at whatever point you are and accompanies you to your objective:

- Uncompromising, as regards securing your assets in a manner suited to your personal situation.
- International, when it comes to providing financial planning solutions which take legal and economic aspects into account.
- and creative, when the task is to implement charitable concepts.
- Together we create continual and lasting added value for our selected international clients.

Our Approach

Our approach is firmly based on four principles:

Relationship Management

The principle of personal advice

You will consult with just one person, your personal relationship manager.

Personal Investment Planning

The principle of an individual strategy

An investment strategy will be developed to meet your personal objectives. The strategy will be evaluated periodically to assess its performance and fine-tuned in consultation with you.

Best advice and best selection

The principle of independence

In selecting investment instruments we have no preconceived notions, our sole criteria are quality and performance and your personal investment goals.

International Fund Management

The principle of a global perspective

International Finance Bank Group can rely on the resources of a broad network of qualified partners. You benefit from expertise in the world's most dynamic financial fields and centers.

Giving you security and peace of mind in a turbulent financial world...
